

Believe Me I Eat Everything

For I Know a Stuart's Dyspepsia Tablet Will Digest Any Meal

At Any Time

How often do we see men who can eat and how often do we hear men boasting of their ability to eat. The secret of all health is digestion. The secret of digestion is the juices which are supplied by the body to separate the ingredients from those that are of no use to the system.

The Pessimist—"Your appetite, I guess, is poor. You eat like a ghost."

The Optimist—"Believe me, I give my body what it tells me to give it, and whether it be midnight or noon I always eat my meals and sleep like a Stuart's Dyspepsia Tablet."

After a heavy meal has been eaten the entire body is called upon to furnish the digestive organs with force to take care of it. The more you strain the weaker become the forces in the care of the next meal.

A Stuart's Dyspepsia Tablet aids Nature in Nature's own way. These tablets are filled with the very ingredients and enzymes so needed for every normal and perfect stomach.

The quality or ingredient of a Stuart's Dyspepsia Tablet will digest 2500 times its weight in food. Think if you can what a big help this means to a distressed digestive system.

Thousands of dyspeptic and stomach sufferers would like to tell you what Stuart's Dyspepsia Tablets have done for them. This is what makes these tablets stand out from all others in this country, price 50 cents.

To anyone wishing a free trial of these tablets please address P. A. Stuart Co., 154 Stuart Bldg., Marshall Mich., and a small sample package will be mailed free.—(Adv't.)

HAS A CURE FOR PELLAGRA

Barrie Nicholas, Laurel, Miss., writes: "Seems to me I had not obtained your remedy when I did I would not have lived much longer. I am glad you discovered this wonderful remedy that will cure Pellagra. I began taking Haugh's Pellagra Remedy, and my weight was 50-60 pounds, now it is 150-160. I would like to have this published and sent to sufferers of Pellagra."

This is published at his request. If you suffer from Pellagra or know of anyone who suffers from Pellagra, let your doctor to consult the successful remedy that has been found and brought the dreaded malady right in the Pellagra belt of Alabama.

The symptoms—burns red like sunburn, skin peeling off, sore mouth, the throat and tongue are aching red, with much mucus and choking, indigestion and nausea, either diarrhea or constipation.

There is hope. If you have Pellagra you can be cured by Haugh's Pellagra Remedy. Get a big free book on Pellagra. Address American Compounding Co., 202 Jasper, Ala., remembering money is refunded in any case where the remedy fails to cure.—(Adv't.)

Fiery Blood Disorders Checked

The Sources of Disease are Cleaned and Blood Purified

These who have used S. S. S. marvel at the way it checks blood disease. See a man today with his skin all broken out, see him again in a week or two after using S. S. S. and he is a wonder to behold, all cleared up, skin healthy, eyes bright, a big smile replaces the frown. What is S. S. S. that can accomplish such wonderful results? First of all it is a natural medicine. Like milk, milk and other foods that are not initiated by S. S. S. it is a natural force for Nature for its power to overcome disease just as food prevents starvation. S. S. S. is not a combination of prescription drugs. It is a preparation direct from medicinal plants that retain all the vital potency of what we need, what we must have to the blood to contract those destructive tendencies that assail us throughout life. If it were not for our natural secretions to cleanse up, as well as those which S. S. S. there would be small chance of any of us surviving childhood.

Get a bottle of S. S. S. today from any druggist but be careful to avoid the substitutes peddled off on the cheap. S. S. S. is prepared only by The Swift Specific Co., 53 Swift Bldg., Atlanta, Ga., and for private medical advice write briefly your symptoms to the medical department. They will take excellent care of you.

Fulton County Uses Thew Shovel

Fulton county has been using a Thew Steam Shovel for the past two and one-half years, in its road building work. This shovel is in operation every day at the corner of Peachtree and Baker, and is one of the most interesting exhibits of the Road Congress.

Do not fail to see this shovel in operation while you are in Atlanta.

THE THEW AUTOMATIC SHOVEL CO.,

Space 17, Auditorium

NOTE: Our men will gladly take you out to see the machine in operation.

EXPECTATIONS FOR HIGHWAY CONSTRUCTION

(Continued from page one.)

tree planting and other landscape treatment of our country highways will have to be provided for.

REQUIREMENTS. Mr. Fletcher then recited some of the typical difficulties encountered by highway engineers in laying out new roads and streets and relocating old roads, and said these difficulties have been his in his work with the highway department of a public utility company. He said that the highway engineer must be equipped with a subtle and diplomatic right-of-way man whose chief duty was to get the property owners into the highway department and to get the highway department into the property owners' hands.

He then went upon the legal aspects of the right-of-way problem from the standpoint of litigation. He said there is a great lack of uniformity in the different states in the methods of dealing with the payment of damages in taking property for public use, and he said the time has come when modern highway construction is becoming so active throughout the country that there should be a simplification in the constitutions and statutes relating to the subject of eminent domain.

Highway Engineer Atkinson, of Louisiana, discussing drainage structures, said that in many cases the drainage structures are more or less makeshift affairs, and he said that the commission according to local conditions should not attempt to set forth rules and regulations governing the type of construction of all drainage structures, but would merely present some of the general methods, factors and policies governing the construction of drainage structures in Louisiana.

PLAN OF WORK. In determining the length of bridges and "spans" and the size of culverts, he said, "consideration is given to the maximum load that will be placed on the ground upon which the bridge or culvert is to be constructed. In determining the length of bridges and culverts, he said, "consideration is given to the maximum load that will be placed on the ground upon which the bridge or culvert is to be constructed."

He said it was the policy of the Louisiana highway department to build bridges and culverts of concrete, wherever feasible, and to build bridges and culverts of steel, wherever feasible, and to build bridges and culverts of wood, wherever feasible.

He said that the Louisiana highway department was now building bridges and culverts of concrete, wherever feasible, and to build bridges and culverts of steel, wherever feasible, and to build bridges and culverts of wood, wherever feasible.

He said that the Louisiana highway department was now building bridges and culverts of concrete, wherever feasible, and to build bridges and culverts of steel, wherever feasible, and to build bridges and culverts of wood, wherever feasible.

HOG AND HOMINY BADGE TO BE AUCTIONED OFF

The first "Hog and Hominy" badge, which will be the official insignia of the Hog and Hominy competition for the first badge bid fair to be keen.

Mr. Williams under the head of excavations saw a great deal of very interesting and valuable data as to the different methods of excavating, the relative cost of each method under different conditions, and in conclusion he discussed some of the important economic phases of highways and highway construction.

LIGHT TRAFFIC ROADS. Discussing the subject of light traffic roads, S. Percy Hooker, state superintendent of the New Hampshire highway department, said that with the immense mileage of roads in the United States "it seems to me perfectly clear that even in the wealthier states a large proportion of the roads will never be improved under the terms which are now considered necessary for their improvement, and that 90 per cent of the entire mileage will be unimproved if it is necessary to provide them with the higher types of construction. My impression is that there must be a revolution of feeling which will compel us to build better roads for ten times of this road there is only available the sum of \$2,000 for improvement of each mile of road, and this really an improved road, which under proper maintenance will take care of the traffic upon it."

Mr. Hooker then gave a hypothetical survey of a ten-mile stretch of road, each condition necessitating special treatment, and said that the road, under these conditions it seemed that the road would be a standard of such a highway in order to economically work out the problem. You must use, he said, the material which is comparatively local and the treatment of each section will be governed by its own peculiar conditions.

Classifying this imaginary road under three general heads, Mr. Hooker then gave a detailed account of the proper points for each section, utilizing the different soils to the best advantage both for foundation and surface.

AFTERNOON SESSION. At the afternoon session, which opened at 2 o'clock, the program consisted of four addresses, as follows: "Selecting the road to be improved," by Fairfax Harrison, president of the Southern Railway; "Heavy traffic roads," by Henry G. Shirley, state highway engineer of Maryland; "Maintenance of roads," by George W. Cooley, state highway engineer of Minnesota; "Maintenance of surfaced roads," by Colonel William D. Schler, chairman of Massachusetts highway committee.

After the session in Tart hall there will be a reception by the county commissioners of Fulton county in the new \$150,000 court house at all the delegates of the congress.

The afternoon session Tuesday was given up to a discussion of civil service reforms.

PIGS AND ROSES SELECTED FOR DECORATION SCHEME

"Pigs" will be pre-eminently before the Atlanta public eye for at least one day during December, that of Thursday, December 2, on the occasion of the Hog and Hominy carnival, and according to the committee on decorations the decoration scheme of "pigs and roses" will be carried out all over Atlanta.

Hog and hominy medallions, eighteen inches in diameter, carrying out the scheme, will be used in the decorations, and smaller replicas of the medallions will be cast in metal, and will be worn in Atlanta during the carnival.

Mr. J. S. Rodgers to Speak

Mrs. J. S. Rodgers, recently returned from Europe, will address the Ladies' auxiliary of the Young Men's Christian association at the regular meeting to be held Friday afternoon at 2:30 o'clock. All members are urged to attend.

Old Granite Block Pavement Made Modern.

The above photograph shows the Alcott Key pavement that was laid four years and nine months ago. Not one cent has been spent in maintenance since it was laid, either between the rails or outside the rails, and there is no signs of any needed repairs.

The Alcott White Oak Key Pavement Is a Real Tax Payer's Pavement

It saves and redeems all badly worn granite blocks, makes a pavement almost noiseless, absolutely non-slippy, and the best horse pavement known. It is a real tax payer's pavement.

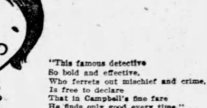

The following letter from the Va. Ry. and Power Co., is one of the many very good testimonials received:

"To Whom It May Concern: "I take pleasure in stating that we have used the wood key block of Mr. Edward Alcott in a number of places in Norfolk, where special work was badly worn, with the result that we have increased the life of this material work by a number of years, and in cases where it has been put in, it has been for four and a half years practically without repair. I consider it the best device for this purpose I have ever seen."

"Yours very truly,"

"VIRGINIA RAILWAY AND POWER CO.,
By E. Hathaway, Asst. Gen. Mgr."

be auctioned off to the highest bidder by George A. Simms, general manager of the carnival, at the Ad Men's luncheon Thursday. Several bids have already been received by mail, and the competition for the first badge bids fair to be keen.

Campbell's Tomato Soup

Get light on the question!

The more you learn about diet and food values, the more you appreciate

You find that the very qualities by which it tempts the appetite so irresistibly also aid the digestion at the same time. It not only tastes good, but it is good and does you good. That's why you should order it by the dozen, and never be without it in the house. Your money back any time if you're not satisfied.

Have you plenty on hand today?

DR. J. T. GAULT

N. Y. ENGINEER TELLS ABOUT CONCRETE ROADS

Says They Could Be Constructed in South for \$7,500 Per Mile

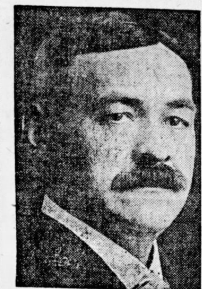

One of the really interesting men attending the Fourth American Road Congress in Mr. William M. Achesson, from Buffalo, N. Y. Mr. Achesson is the district engineer for New York state's department of highways, and he is a road enthusiast from start to finish. Mr. Achesson talks very interestingly of the road work being done in New York state, and especially in this case when it comes to talking concrete road building. He stated to a representative of The Journal yesterday that the department had just this year built 10 miles of concrete road in western New York alone. This road was "T" shaped and was laid under the 1, 1-1/2 and 2 agreement. Mr. Achesson has also been supervising the building of 10 miles of concrete road in his state for some time. Mr. Achesson stated, when asked about the cost of constructing concrete roads in New York, that the cost of building the roads, when let by contract, was from \$14,000 to \$18,000 per mile. The cost of building these roads by force account, around \$10,000 per mile. When asked what he thought the average cost of building concrete roads in the south would be, where concrete slabs were used, he stated that he believed it could easily be done for from \$7,500 to \$8,500 per mile.

ROADS AT MAINTENANCE COMPAIRED.
Mr. Achesson stated that the average maintenance for dirt and macadam roads was \$500 per mile per year. He had been shown by experts that the average cost of maintaining concrete roads was not over \$100 per mile per year.
He stated about the plan for an asphalt concrete road building, Mr. Achesson said that one plant, sufficiently large to build a mile of road every fourteen days, could be bought for \$5,000. This plant would consist of a ten-ton steam roller, one No. 10 concrete batch mixer, three, two miles of pipe, gasoline pump tools and eighteen wheelbarrows. The small tools for this outfit could be bought for \$150. Mr. Achesson said he stated that the concrete mixer should make twelve revolutions before the mixed product was dumped out to be used in the roadway.

CONCRETE BRINGS GOOD FOR HORSES.
Mr. Achesson stated that it was a popular belief that concrete roads were bad, but that such was not the case. He stated that the rough surface was never thing the horse needs, in pulling heavy loads nor slick as supposed by many. He said the roads in New York had not been built upon a grade of 8 per cent, and that the horses were found to hold perfectly on a grade of that percentage. He stated that after many years of experience in road building he had come to the conclusion that the concrete road is the best for permanency and economy.

GERMANS THREATEN TO STOP U. S. RELIEF WORK
LONDON, Nov. 11.—A proclamation issued by the Germans at Brussels appealing to the German people to stop the relief work, according to a dispatch to Reuters' Telegraph company from Amsterdam, to stop the distribution of food by the American relief committee among the unemployed until the cause goes to work.

Will Preach to Old Weds, Newly Weds and The Would-Be Weds

DR. L. O. BRICKER.

Married people, people about to be married, and people who want to be married some day, will be interested in a series of sermons to be preached by Dr. L. O. Bricker, pastor of the First Christian church, under the title of "Little Problems of Married Life." The sermons will be preached every Sunday evening at the church, beginning next Sunday. They are as follows: November 15, "Love and Marriage." November 22, "Facing Life Together." November 29, "Making Good as a Husband." December 6, "Making Good as a Wife." December 13, "Things That Matter Most." December 20, "Home Ideals and Realities." December 27, "Between One Man and One Woman."

NEW SUBURBAN FREIGHT STATION IS NOW OPEN

Depot at 20 N. Butler Street
Supplants Walton Street Place
The new suburban freight depot of the Atlanta trolley was opened for service early Tuesday morning at 20 North Butler street. This supplants the old freight station in the Electric and Gas building at Walton and Prairie streets, which has been inadequate for some time. All freight to be handled by the Georgia Railway and Power company will be delivered or received hereafter in the Butler street depot. Advance notice of the move was published in all papers of the trolley freight, but some of them overlooked it, and throughout Tuesday and Wednesday morning trucks and wagons were being turned away from the old station.

PARTY OF ROYALTY FROM EGYPT REACHES NAPLES

NAPLES (Via Rome), Nov. 10.—Prince Mohammed Ali Pasha, the brother of the khedive of Egypt, accompanied by his uncle and cousin, Princes Hussein and Aziz Hassan, arrived here today aboard the steamer *Corinthia*. Prince Aziz Hassan at one time was commander of the Turkish cavalry at Kirk-Kilis.

CONCRETE PAVEMENT IS SHOWN AT AUDITORIUM

Exhibit of Roadway 20 Years Old Attracts Much Attention

In Bellefontaine, Ohio, surrounding the public square, is proof of words of the big electric sign on the auditorium stage, "Concrete for Permanent Roads." Twenty years ago, Bellefontaine laid four blocks of concrete pavement. Some of the specifications were crude. The street was cut up into five-foot squares. But the concrete was well made and today the pavement is smooth, slightly gives a good foothold to horses and promises twenty years' more of service.

A slab, weighing 2,800 pounds, was removed from East Columbus street, the busiest traveled block in Bellefontaine, and is on exhibition in booth at the auditorium.

For a pavement to withstand twenty years of steel tired traffic with little signs of wear is remarkable, especially since the art of making concrete is advancing every year.

Two of the four blocks have required no maintenance and the other two have been repaired once at a total cost of \$200. This consisted of repairs to longitudinal joints only. The transverse joints showing no appreciable wear. The surface of the slabs has worn down evenly but to such a slight extent that the original markings are yet to be seen.

When it is considered that the only repair in twenty years has been upon longitudinal joints, and that no longitudinal joints are needed or permitted by modern specifications, it is clear that Bellefontaine's practice is a striking lesson for present-day engineers.

The city engineer in 1894 was James G. Wonders, now consulting engineer in the west and the contractor was W. T. G. Snyder.

The pavement slab shown at the auditorium was taken from a point five feet from the curb where maximum traffic would give a severe test. It is typical of the entire four blocks.

OKLEY AND LACY TO BE TRIED ON DECEMBER 1

(Special Dispatch to The Journal)

MOBILE, Ala., Nov. 11.—Trials of James G. Oakley, former president of the state board of convict inspectors, and Theo. Lacy, former clerk, on additional indictments charging the embezzlement and conversion of state funds, have been set for December 1 in the city court. However, it is probable the cases will be continued until the court of appeals has passed upon Lacy's appeal from a ten-year sentence imposed by the city court in another case.

OLD SOLDIERS WILL BE GIVEN CROSS OF HONOR

Atlanta Chapter United Daughters Will Present Medals Thursday

Sixteen Confederate veterans will be given crosses of honor Thursday afternoon at 3 o'clock at the Woman's club, on Baker street, by Atlanta chapter United Daughters of the Confederacy. Mrs. T. T. Stevens, acting president of the chapter, will present the crosses. All veterans and their friends are invited to be present. Crosses will be awarded to the following: H. H. Blizard, J. M. Chambers, L. F. Chilwood, M. A. C. Cochran, Newton Frazier, T. H. Glazier, M. P. Harkness, John W. Horton, J. P. Jones, M. L. Lemmon, R. W. Rivers, I. J. Smith, L. E. Sparks, J. J. Parker, T. G. Willis and T. M. Yopp.

If any of these veterans find it impossible to be present they are requested to have some one attend the exercises and receive the cross for them.

New Bank for Dublin
Secretary of State Philip Cook Wednesday morning granted a charter to the Southern Exchange bank, of Dublin, Laurens county. This bank will have \$50,000 capital and about sixty well known citizens of Laurens and surrounding counties are the incorporators.

SIMPLY BREATHE IT

That's the Way You Use Hyomel, the Simple, Safe and Effective Catarrh Remedy.

The most pleasant, easiest, safe, effective, and the really sensible method for the treatment and cure of catarrh is Hyomel, which can be had from any drug store. Just put twenty drops of the liquid in the small inhaler that comes with every complete outfit, then breathe it a few minutes four times a day. It almost instantly clears the head and stops that annoying sniffing. When using Hyomel every particle of air that enters the breathing organ is charged with an antiseptic, healing, health-restoring balsam that destroys the catarrh germs, stops the unpleasant discharges from the nose, relieves the irritation, and quickly heals the sore, raw and inflamed tissues.

The first day's use of Hyomel will show a decided improvement, no matter how distressing the trouble. Its action is not only rapid but lasting. There is no more common yet dangerous disease than catarrh, which usually begins with a neglected cold. Do not endanger your health by letting your catarrhal trouble become chronic. Begin the Hyomel treatment today—it is inexpensive, safe and reliable. Jacob's Pharmacy always sells it with agreement to refund the money if it does not give complete satisfaction.—(Adv.)

GEORGIA BANKS FORM

CLEARING HOUSE ASS'N

Not Opposed to Reserve But Must Protect Business, Bankers Say

To put Georgia state banks which are not members of the federal reserve system on an equal footing with Georgia national banks which are members, six-five Georgia bankers met in the Atlanta chamber of commerce building Tuesday afternoon and organized the Georgia clearing house association.

This organization was effected because the state banks realized they must either become nationalized and join the federal reserve, or else form an association of their own.

When the federal reserve bank in Atlanta begins operations, with its subsidiary banks throughout the Atlanta district, the checks of these member banks will be cleared at par at any point in the United States with other national, reserve member banks; the organization formed Tuesday aims to give equal facilities to Georgia state banks.

Atlanta will be the headquarters of the state association, which will begin operations about January 1.

The proceedings of Tuesday's meeting are to be printed and sent to the 616 Georgia state banks and the 125 Georgia national banks. It was agreed that all Georgia banks, state and national and private, would be eligible for membership in the association.

ANOTHER MEETING SOON.

Another meeting will be held in the near future, at which time a committee appointed Tuesday's meeting to plan for final organization will report. It is expected that the banks will be controlled as members by the next meeting. The committee to perfect organization is composed of Rufus H. Brown, S. B. Council, George H. Smith, R. O. Pitts, F. T. Handwick, J. E. Dunson, S. B. Brown, Asa G. Chandler, C. H. Humphrey, A. P. Coles and C. H. Lewis.

J. E. Dunson, chairman, was authorized Tuesday to appoint a banking institution to be the clearing house for the clearing house association, which will have charge of the clearing house association.

Mr. Dunson, chairman, was authorized Tuesday to appoint a banking institution to be the clearing house for the clearing house association, which will have charge of the clearing house association.

FARMER BOYS ANXIOUS FOR BIG CORN SHOW

Luther Allred, Who Raised 227 Bushels to the Acre, Will Be Feature

The star and special guest of the Georgia Corn show this year will be Luther Allred, of Pikeville county, who is reported to have made a new high record for the state by gathering from one acre of land 227 bushels of corn. He has been a prize winner at the Georgia Corn shows for several years, and will be the recipient of special honor this year.

Many of the boys who will be here, many of whom have enthusiastic stories to tell of their experiences in producing years.

Mr. Allred, president of the chamber of commerce, is preparing to entertain at his home on Peachtree road, two of the record-breaking boys, Luther Allred and Ben Leath, who made 211 bushels to the acre in 1911 in Walker county.

In Bankruptcy Court

Harry T. Wells, a chauffeur, has filed a voluntary bankruptcy petition, listing liabilities of \$540 and assets of \$235.

RAILROADS LEND AID TO BELGIAN IMMIGRATION

Officials Will Attend Meeting in Atlanta on November 24

Impetus has been given the work of the committee organized to encourage Belgian immigration to Georgia by the announcement that President Peyton, of the Nashville, Chattanooga and St. Louis railway, and other officials of the same road, will be present at the meeting here on November 24.

The meeting has been called by Robert F. Sjeddin, chairman of the Belgian immigration committee, for the purpose of adopting a plan to encourage Belgians to come to the south.

The co-operation of the railroads, it is said, will be essential to the plan and members of the Atlanta committee are enthusiastic over the interest shown by the N. C. & St. L. officials.

Besides President Peyton, F. M. Ewing, industrial agent, and Charles Barling, general freight agent, will attend the meeting.

Responses to the committee invitations are expected from other railroad officials.

The following letter has been received from General Manager D. B. Carson:

of the N. C. & St. L. Railway:
Nashville, Tenn., Nov. 9, 1914.
Mr. R. F. Sjeddin,
Manager of the Mutual Life Insurance Company, Atlanta, Ga.

My Dear Mr. Sjeddin: Yours of the 6th inst. received, and I note with interest the enclosed. This is a move in the right direction, and I wish you success.

President Peyton is very much interested in the work and expects to be present at the meeting on the 24th. He will be accompanied by our industrial agent, Mr. F. M. Ewing, and our general freight agent, Mr. Charles Barling.

With kind personal regards, and hoping to attend the committee meeting at 2:25 p. m. next Wednesday, I am,
Yours very truly,
D. B. CARSON.

When Housework Is Burdensome

when you are easily and nervously excitable, you need medicinal food—not drugs or stimulants.

SCOTT'S EMULSION is rich in food value; it supplies the very elements to enliven the blood, restore strength and the courage of health.

Avoid Alcoholic Substitutes.

YOU can buy good bulk apples from cars cheap, at Southern railroad, Madison avenue team tracks.

Would You Trust A Man

whose surroundings, mode of life, and food and drink, have combined to make him treacherous, indolent and unreliable?

And food and drink are among the chief causes.

Coffee—one of the commonest beverages—contains a drug, caffeine, which affects stomach, liver, heart and other organs.

Some persons are strong enough to stand the attacks of the coffee-drug, but to most people it is a poison, and sooner or later is bound to tell.

If you find coffee is hurting you, quit it and try.

POSTUM

This healthful food-drink is made of prime wheat and a bit of wholesome molasses, carefully blended and roasted. It contains the food elements of the wheat and molasses and nothing else—nothing injurious or harmful.

Serve Postum piping hot and it is delicious and invigorating.

"There's a Reason" for POSTUM

AUTO PARKING MEASURE GETS FAVORABLE REPORT

Ordinance Prohibiting Parades on Whitehall and Peachtree Also Approved

An ordinance fixing the time limit for parking automobiles on certain congested thoroughfares to thirty minutes, and an ordinance prohibiting circus and wild west parades on Peachtree, Whitehall streets, will be reported favorably to the next session of the council.

On the automobile ordinance Tuesday afternoon the committee heard a delegation of retail merchants, who asserted most positively that women could not shop in half an hour, and they urged that the limit be increased certainly to forty-five minutes. The ordinance committee, however, stood by the ordinance as originally drafted, but told

WASHING WON'T RID HEAD OF DANDRUFF

Dissolve It, That's Best Way

The only sure way to get rid of dandruff is to dissolve it, then you destroy it entirely. To do this, get about four ounces of ordinary liquid arvon; apply it at night when retiring; use enough to moisten the scalp and rub it in gently with the finger tips. Do this tonight, and by morning most if not all of your dandruff will be gone, and three or four more applications will completely dissolve and entirely destroy every single sign and trace of it, no matter how much dandruff you may have.

You will find, too, that itching and digging of the scalp will cease at once, and your hair will be fluffy, lustrous, glossy, silky and soft, and look and feel a hundred times better.

If you want to preserve your hair, do nothing destroys the hair more quickly than dandruff. It not only starves the hair and makes it fall out, but it makes it stringy, brittle, dry, brittle and lifeless, and everyone knows it. You can get liquid arvon at any drug store. It is inexpensive and never fails to do the work.—(Adv.)

The Best Remedy For All Ages

and proven so by thousands upon thousands of tests the whole world over, is the famous family medicine, Beecham's Pills. The ailments of the digestive organs to which all are subject, from which come so many serious sicknesses, are corrected or prevented by

BEECHAM'S PILLS

Try a few doses now, and you will know what it means to have better digestion, sounder sleep, brighter eyes and greater cheerfulness after your system has been cleared of poisonous impurities. For children, parents, grandparents, Beecham's Pills are matchless as a remedy

Concrete for Permanent Roads

Progress of Concrete Highways Shown by Years in Square Yards

1910
1,009,120
1911
2,014,740
1912
5,550,656
1913
8,676,160
1914
17,126,400

It is estimated by competent authorities that a total of more than 1,800 lineal miles of concrete roads of varying widths will be built this year. From California to Connecticut and from Mississippi to Minnesota the Concrete Road is daily gaining in favor with those who know that not merely first cost, but construction costs plus annual maintenance charges determine whether a road is cheap or expensive.

First Concrete Road in Fulton County Built by Convict Labor, Andrews Avenue Between Peachtree and Pace's Ferry Roads.

What is a Concrete Road?

A concrete road is the last word in highway construction as we know the art today.

It is a slab of Portland cement concrete on a prepared sub-grade and molded into perfect road shape with engineering accuracy. The concrete is composed of materials identical with those which have entered into all the great engineering works of modern times, locks, dams, bridges, viaducts and other structures demanding strength, solidity and resistance to the elements. It may be plain or reinforced as conditions require. Its thickness is commensurate with the load to be borne. The width varies with the density of traffic from the full width of the highway to a comparatively narrow slab with shoulders of gravel, cleft or macadam to accommodate vehicles when passing.

The Concrete Road is the exemplification of the Square Deal in highway construction. It gives the taxpayers a square deal because road funds are wisely expended and produce enduring results. The highest engineering skill and scientific knowledge are available and are at the beck-and-call of any county which wishes to build concrete roads. Posterity is given a square deal because the concrete road will be in place and giving service when the bond issue matures and has to be paid.

No county is rich enough to ever complete its road-building program unless concrete is adopted for its highways. It is not possible to both build new roads and maintain a large system of once-improved highways that are rapidly breaking down. Every main road in any county should really be permanently improved, but this is only possible where concrete is used. Many counties spend far more money on maintenance than on road-building. Maintenance is built into concrete in the beginning.

There is no guesswork about concrete and nothing is left to chance.

A concrete road is scientifically designed and constructed to give the ultimate degree of service at the minimum of cost.

A concrete road should be built on a foundation that has been given adequate treatment in preparation and drainage. Then when the concrete is laid and properly cured that road is a permanent addition to the highway system of the world.

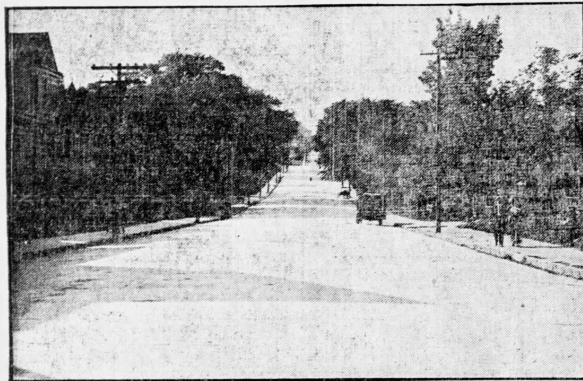

Portland cement concrete is the only known material which increases in strength with age. It does not soften under heat nor grow brittle when cold. It is the ideal road material. A concrete road is smooth but not slippery in wet weather. It affords perfect footing for horses. Veterinarians say that road injuries to horses are caused by holes and small stones that roll under their feet, not by hard road surfaces.

The concrete road has no superior as a Safety First surface for automobiles and motor trucks. Side-slipping which causes skidding is never chargeable to the concrete road. It does not become rutted or uneven. There are no waves and no loose stones to make trouble, the surface remains as it was when turned over to traffic. It is built to stay, and it stays.

The concrete road is largely composed of local materials. The sand and the gravel or crushed stone come from nearby and the money expended for them stays at home. Ordinary labor under skilled supervision does the work satisfactorily, and the money expended for labor can stay at home. Fulton county, Georgia, is

securing splendid results with negro convict labor. Georgia counties with excellent sand and gravel accessible and cheap convict labor can build concrete roads more cheaply than any other section in the land.

Nothing is left to chance in building a concrete road. The cement is inspected officially; the materials are inspected and tested; the mixing is done mechanically and to specification; the placing is done according to practice that is the result of long experience. Under competent supervision the making and placing of concrete is at once the most scientific and the most practical process in the entire construction field.

Walnut Street, Macon, Ga., Carries Heavy Traffic from Adjoining Counties, 46 feet wide; eight inches thick; laid three years ago and in perfect condition.

Lee County, Miss., Building Eleven Miles Concrete Road This Year

Lee county, Mississippi, is a typical southern cotton county. The population is about 30,000; the assessed valuation of taxable property is \$7,500,000; the area is 428 square miles. Tupelo, the largest town, has approximately 5,000 people; the cotton receipts there are heavy, about 70,000 bales annually. In 1910 one road district in Lee county voted a bond issue of \$100,000 and expended it in macadam roads. Another district has since issued bonds and expended the same amount on roads of the same type. Lee county wanted Good Roads, and built good roads, but not lasting roads. The macadam roads have been gradually wearing out, calling for maintenance and repair expense. They have had to

be oiled to keep them from going to pieces with greater rapidity under the traffic of an ordinary southern county.

This spring there was another road district bond issue to be expended. The people had heard of concrete roads, and the Board of Supervisors and other citizens went to Wayne county, Michigan, to inspect the roads there. They saw and were satisfied that concrete, and concrete only, would give them permanent roads. As a result eleven and one-half miles of concrete road is now being built between Siltillo and Verona, the most of the stretch now being complete and in use. The photographs will show you the kind of road they are getting; the passing years will show they are getting the worth of their money, which is more than the other bond issues brought them.

of better roads. How many of them have seen the roads that were built with the bond issues they pleaded for with the people go to pieces in a few short years? It has happened everywhere, more's the pity; it happened in Lee county, but the officials there are profiting by their mistakes. They are building a road that will be a monument to them, such a monument as the Appian Way is today to the old Romans. When the bonds mature this road will still be such an asset to Lee county that it could be bonded again, in all likelihood.

There are many southern counties that have no outstanding bonds for roads that have gone to pieces. They are in position to take advantage of what the whole country has learned in the last few years—that at least we know how to build lasting roads. There is no more experimenting to be done; there is no guesswork; there are no secret processes nor manufacturers' royalties necessary any more. The concrete road is the outcome of ultimate engineering skill and knowledge, the results of endless experimentation and comparison, the consummation of the road economist's brightest dream, a highway reasonable in first cost and inexpensive in maintenance. A Permanent Road.

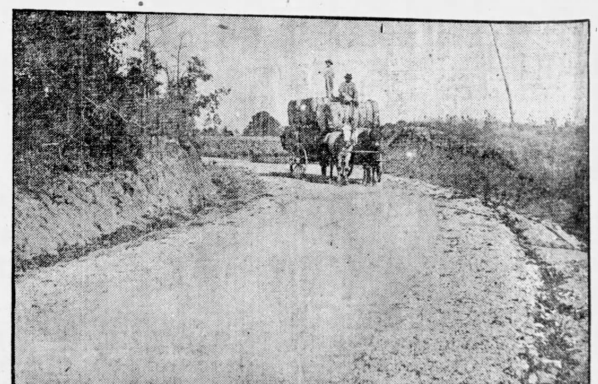

Intersection of Hill Street and Prince Avenue, Athens, Ga. 20,500 square yards of two-course concrete pavement, seven inches thick.

The Lee County road is nine feet in width of concrete with a three-foot shoulder of macadam on each side, making a 15-foot highway and the contract price is \$6,100 the mile. That is the first country road of concrete in the lower south, the forerunner of hundreds of miles yet to be built. Here are the names of the men that compose the board of supervisors: B. F. Parker, chairman, Guntown; F. M. Roper, Siltillo; W. T. Pound, Tupelo; W. D. McGaughy, Verona; I. B. Cogging, Nettleton and D. W. Robins, Tupelo. These men have done something to entitle them to more than local fame. We have many Good Road Enthusiasts here in the south, many men who have worked long and arduously for the cause and have been responsible for increasing the mileage

The Verona-Siltillo Road in Lee County, Mississippi, Before the Work of Improvement Began. Typical of Thousands of Miles of Southern Highways.

The Lee County, Mississippi, Road, After the Concrete Was Laid. The Capacity of the Wagon Governs the Load. The Team Can Pull All the Wagon Will Hold Up. The Road Will Serve Future Generations as Well as the Present.

GOVERNOR SIDESTEPS
STEAM ROLLER TOAST

For Once "Highwaymen" Are
Made to Feel at Home
in Atlanta

Starting with "America" and closing with "Show Me the Way to Go Home," some 200 of the notables attending the Fourth American Road congress were entertained Tuesday evening at a banquet at the Kimball house.

There was a minimum of seriousness and a maximum of frivolity, a brilliant display of wit and humor, an abundance of song, and bountiful supplies of food and good cheer.

Secretary Fred Houser, of the Atlanta convention bureau, was there with his convention hymn book as usual, and made everybody happy right from the start.

Robert F. Maddox, the toastmaster, formally opened the banquet with a toast to President Woodrow Wilson, who welcomed the "highwaymen" to Atlanta, spoke eloquently of the city's rise in fifty years from the ashes of war, and declared the south is now about to experience a re-birth of prosperity in plentiful crops.

THE STEAM ROLLER.
There were no set subjects for the speakers. It being left to Mr. Maddox's sagacity to propose an appropriate response for each of them, and he brought down the house with laughter and applause by calling on Governor John M. Slaton, the first speaker, to tell about the operation of a modern steam roller as a political convention.

Following with a broad smile on his face, Governor Slaton retorted by saying he thought the guests were going to forget about steam rollers and other technical features of road building, and give themselves up to good fellowship. He told several good stories, spoke humorously and sympathetically of the negro as he knew him in the south, and closed eloquently on Georgia's resources.

The next speaker was Richard H. Pimonds, of Baltimore, editor of the Manufacturers Record. His magnificent outline of the part which the south is to play in the material development of the nation was the nearest approach of the evening to a serious speech. He was heard with profound attention and given round after round of applause.

After Mr. Edmunds came a speaker introduced as Logan Waller Page, director of the United States office of public roads and a brother of Thomas Nelson Page. A tall, distinguished looking man arose in a corner of the banquet hall and made a most happy speech in which a few facts were mixed with a great deal of fun. He spoke of being born in Virginia, invited the assembled road builders to make full use of the office of public roads, and complimented Fulton county upon her splendid system of highways. It was a speech which fitted Mr. Page perfectly, but the gentleman speaking was not Mr. Page.

NOT MR. PAGE.
He was Colonel W. D. Scholer, highway engineer of Massachusetts. Mr. Page, being kept away from the banquet, asked Colonel Scholer to do the honors for him, and no understudy of the stage could have filled in better for his principal. About half the banqueters didn't "wake up" to the hoax until some of the subsequent speakers began to speak.

Among the other speakers were John Temple Graves, of Atlanta, who spoke with his characteristic flow of beautiful imagery; Luke J. Duffy, of Indiana, who responded to the toast, "The Cow Man's Best Friend"; A. G. Batchelder, secretary of the American Automobile association; Charles P. Light, business manager of the congress.

POLICE THREAT CAPTIVE IS AN ESCAPED CONVICT
In the person of George Copeland, a negro held at police headquarters on suspicion of having on last Wednesday set fire to a little store operated by him in the rear of 143 North Boulevard, the city detectives believe they have a life-term convict who escaped from the Marietta county chain gang in 1911.

Copeland was arrested Tuesday morning by Detectives Hamby and Vekery. He is said to answer the Bertillon description and measurements of a negro murderer for whom a reward is outstanding.

LEADERS AMONG ROAD BUILDERS

J. S. Pennybacker, executive
secretary of the American
Road Congress

Charles P. Light, business manager of Road Congress and field secretary of American Highway association.

DR. WEBB'S LECTURES
ATTRACTING ATTENTION

"The Ruin of Life" Will Be
Subject for Wednesday
Night

Much interest centers in the series of lectures being given at the Central Presbyterian church by Dr. R. A. Webb, of Louisville, Ky. Dr. Webb takes as his general subject "Holligan and Life." Wednesday night he will lecture on "The Ruin of Life." Dr. Webb is said to be a man of exceptional personality and force and a speaker of ability. Tuesday night he addressed a large gathering on "The God of Life." The lectures began promptly at 8 o'clock. No admission is charged.

Two Negroes Convicted
Found guilty of burglarizing Greenblatt's pawn shop, 123 Peters street, and setting away with a small arsenal of revolvers, guns and knives, Will Jones and Cliff Hawkins, both colored, were sentenced Tuesday by Judge Ben H. Hill, of the superior court, to serve seven years each on the chain gang.

WILLIAM MARKHAM
RESTS AT OAKLAND

The funeral of William Markham, insurance man of Atlanta, who died Monday, was held Tuesday afternoon from the residence of his sister, Mrs. Smith D. Fickett, on the Howell Mill road. The Rev. J. S. Lyons, pastor of the First

Presbyterian church, officiated and the interment was in Oakland.

Dr. King Is Ill
The many friends of Dr. J. H. King will regret to learn of his critical illness at his home on Gilmer street. Dr. King, who is a Confederate veteran, formerly lived in Asheville, Ga.

NEW JOURNAL-HERALD
HIGHWAY WONDERFUL
ROAD, SAY DELEGATES

Stretch of Work Through
North Carolina, Now Near
Completion, Will Be Best
Highway in United States

Delegates to the Good Roads congress tell of the marked improvement of that part of the Journal-Herald highway between New York and Atlanta which passes through three North Carolina counties, Forsyth, Davie and Iredell. Through a newspaper campaign and petition to the government a \$100,000 post road from Winston-Salem to Salisbury has been almost completed, and by the end of the year will be one of the finest stretches of highway in the United States.

The agitation for the road began with the passage of a bill carrying an appropriation of \$50,000 to bridge the Yadkin river. It was followed by a \$175,000 long issue in Davie county. Just at this time the \$1,000,000 congressional bill was introduced for experimenting on post roads, and a commission from the three counties making application for part of this sum, secured \$50,000 from the government.

Since work began on the road two steel bridges have been erected over the Yadkin river, and more over other rivers in the three counties. The mud which troubled motorists in the past has been entirely limited, and the post road, running past such historic places as the grave of Daniel Boone's father and mother, the grounds of Colonel Bryant, of Tory fame, and interesting places

about Salem, gives pleasant passage to all motorists on the route between New York and Atlanta.

HOW TO CLEAR
AWAY PIMPLES

Bathe your face for several minutes with Resinol soap and hot water, then apply a little Resinol Ointment very gently. Let this stay on ten minutes, and wash off with Resinol Soap and more hot water, finishing with a dash of cold water to close the pores. Do this once or twice a day, and you will be astonished to find how quickly the healing, antiseptic Resinol medication soothes and cleanses the pores, removes pimples and blackheads, and leaves the complexion clear and velvety.

Resinol Ointment and Resinol Soap stop itching instantly and speedily heal skin humors, sores, burns, wounds and chafing. Sold by all druggists. For free trial size, write Dept. 42-R, Resinol, Baltimore, Md.—(Adv.)

The Prices Below Tell a Wonderful Story of
Economies for Those About to Buy

Blankets and Comfortables

Without a cut price in the list the prices below tell of economies—of savings that do not sacrifice one whit of quality and genuine worth, but are, nevertheless, so strong and real that the good housekeeper is going to appreciate them at once.

We have made this **THE** blanket and comfortable store this season by the forehand method of preparation.

We bought when prices were lower than they are now.

We are selling on the basis of that cost.

Examine, will you? Feel the blankets, rub them between your fingers, lift them! They tell you in this mute way much more positively than our words can just how worthy they are—that they are some fifteen per cent better than they would be, had we waited to collect them.

Checked Blankets

- Size—
11-4—One-half wool; blue, pink and white \$3.50
11-4—Wool; blue, pink, gray and white \$4.50
11-4—Wool; blue, pink, gray and white; large checks \$5.00 to \$7.50
12-4—Wool; blue, pink, gray and white; large checks \$10 and \$12.50

White Blankets

- Size—
10-4—Wool; with blue and pink borders \$4.50 to \$7.50
11-4—Wool; with blue and pink borders \$5.00 to \$8.50
12-4—Wool; with blue and pink borders \$6.50 to \$10.00
13-4—Wool; with blue and pink borders \$12.50 to \$17.50

Wool Filled Comfortables

- Size—
6x7 feet—Sateen covers, many colors \$3.50 to \$7.50
6x7 feet—Silk Covers \$10.00 to \$15.00
6x7 feet—Broad silk covers \$20 to \$40

Down Comfortables

- Size—
6x6 feet—French sateen covers \$5.00
6x7 feet—French sateen covers \$6.50 to \$10
6x7 feet—Rich silk covers \$12.50 to \$25

Ask For Carter's Knit Underwear

There is much in a name!

Carter's on knit underwear is a mark of worth.

Perhaps no factory in America has succeeded in producing such splendid knit underwear as the Carter people. Certainly, in all our searches for the most dependable, satisfactory kinds we have not found its equal.

So if this store's efforts to place before its customers right merchandise at right prices is worth anything, choose from—

Women's Union Suits

Of light and medium weight cotton in the following styles, regular sizes, \$1.00; out-sizes, \$1.25.

- High neck, long sleeves, ankle length.
High neck, long sleeves, knee length.
High neck, short sleeves, knee length.
Dutch neck, elbow sleeves, ankle length.
Low neck, no sleeves, ankle length.
Low neck, no sleeves, knee length.
Half wool, high neck, long sleeves, ankle length, or Dutch neck, short sleeves, ankle length, \$1.50; out-sizes, \$1.75.
Silk and wool, high neck, long sleeves, ankle length, \$2.00, \$3.00, \$4.00.
Silk and wool, Dutch neck, short sleeves, ankle length, \$2.00; out-sizes \$2.50.

Women's Vests and Pants

Of cotton in light, medium or heavy weight; vest with high neck, long or short sleeves; pants tight at knee or ankle length, 50c.

Of wool or silk and wool, high neck and long sleeve vests, ankle length pants to match, \$1.00; out-sizes, \$1.25.

The same in a better, non-shrinking wool, \$1.50 and \$2.00; out-sizes \$1.75 and \$2.25.

Knitted Corset Covers

Of cotton, long or short sleeves, 50c.

Of wool, long sleeves, 50c, 75c.

Of silk and wool, long sleeves, \$1.00.

Children's Union Suits

Of light weight cotton, high neck, short sleeves, knee length, all sizes, 50c.

Of medium weight cotton, high neck, long sleeves, ankle length, 75c.

Fleece-lined cotton suits, all sizes, 50c.

Half wool suits, high neck, long sleeves, ankle length.

Sizes 2 to 6, \$1.00.

Sizes 7 to 9, \$1.25.

Three-quarter wool, high neck, long sleeves, ankle length, \$1.00 and \$1.25.

Children's Underwear

Vests and pants, medium weight cotton, 25c.

Vests and Pants, heavy fleeced cotton, 25c.

Vests and pants, cotton and wool, 50c.

Vests and pants, all wool, white, \$1.00.

Infants' Knit Vests

Sizes 1 to 6.

Of cotton, soft and white, fine rib, light, medium and heavy weight, 25c.

Of wool, light weight, white, 50c.

Of wool, medium weight, white, 75c.

Of silk and wool, very fine, \$1.00 and \$1.25.

Why not let Mexico and Turkey fight out the
minor engagements?

The Progressives decided to endorse Hiram John
son and let it go at that.

The iron and steel business may be quiet now,
but wait until Germany exhausts the supply of iron
crops.

Turn the Water On the Wheel.

"Turn the water on the wheel." This phrase
taken from the old water-mill of former times still
survives and may now be used to point for the South
an economic moral.

Drawn from the wide fields of life plates, cotton,
transformed into money, yields the life flow of southern
commerce. When this flow is stopped, the mill wheel
of southern business ceases to turn. No crisis is
ground.

For reasons too well known now to repeat the
present vast cotton crop has not been changed into
money. It represents a great headwater of wealth,
not flowing, but pent-up. It has until recently been
shut off from the mills of business or at most has
run but in a dribble.

The stoppage of the flow was at one time neces-
sary and justifiable in order that a wasteful flood,
a business calamity might be averted. But this danger
has now been passed and the necessity for holding
cotton no longer exists.

On the contrary the finger of wisdom and the
voice of duty both now bid the cotton growers sell
enough cotton to pay their debts. So much should
be sold and no more. The rest may be held for
higher prices. But every bale now withheld from
the market that represents money needed for the
discharge of debts means only another slice of gate
left down across the stream to still the mill-wheels of
Southern business.

In the present situation every department of our
commercial life must do its part. The banker must
do his part but he can not do it all. The merchant
must bear his part of the burden but he cannot bear
it all. The cotton grower must carry his share
and surely no one would see him carry it all. We
must all stand together, shoulder to shoulder.

But if the cotton growers sell no cotton and pay no
debts, then the burden is shifted unfairly to the
shoulders of every other southern business interest.
But if debt cotton be sold and the debt canceled, then
the burden's adjustment becomes perfect. We do
not believe the cotton growers will tolerate any un-
equal advantage. We know the quality of their
manhood too well to think that they will.

Recent events have conspired to make the loosening
of the sluice gates all the easier. Cotton is beginning
to find European markets. The world's needs, not-
withstanding the war, are beginning to demand it.
Get out of debt. Sell enough cotton to do so.

Turn the water on the wheel!

Meanwhile Villa and Carranza are deploying their
right and left wings.

Now that the war shows no sign of abatement,
let American tourists see Atlanta first.

Colonel Roosevelt has evidently taken the philo-
sophical view that you can't win a race if you have
insufficient votes.

Busy Belgian Workers For Idle Georgia Lands.

So timely and so potent of great good for the state
has proved the movement to bring Belgian refugees
to Georgia as permanent settlers that it has out-
grown local confines and unconcerned action and as-
sumed state-wide proportions and taken on the
definite form of a well-directed campaign.

Robert F. Shedd, chairman of the Belgium im-
migration committee, has issued a call for a meeting
of that body in Atlanta on November 24. Assurances
have already been received from a large group of
progressive interests including farmers' associations,
boards of trade, county commissioners and town
councils in many parts of the state, that they will
send delegates to the meeting.

In addition to this the committee has opened per-
manent headquarters at 1012 Grant building, Atlanta,
for the purpose of taking care of the correspondence
that is already beginning to develop, and what the
committee now wants is more correspondence.

What it desires is to hear from the land owners
of Georgia, large and small. It wants to know how
many Belgian immigrants they will take upon their
lands and upon what terms.

Here indeed is the opportunity of a century for
Georgia land owners. Never again will there be
such another for securing settlers, so desirable. Bel-
gians do not ordinarily emigrate. Why? Because
with their individual intelligence, energy and thrift
they made their own country laugh with prosperity
and plenty. But now the war has scattered their
plenty and ruined their country. They are homeless,
Sixty-eight per cent of the land of Georgia goes
unutilized each year. Just think what those thrifty
Belgian farmers could do for those idle acres—those

tillers of the soil who know how to make every inch
of earth yield its utmost harvest. Think of the in-
estimable service Georgia will be to them in their
desolated condition, in offering them the harborage
of its broad reaches of hill and vale. And think,
too, of the service they will be to Georgia, the wealth
producers they will become, the contributions they
will make to the intensive and diversified agriculture
of the state, and the valuable addition they will be
in every respect to our citizenship.

These considerations positively make one glow
with the contemplation of the bigness of the things
that may come out of them. We mistake the quality
of alertness of Georgia land owners if they do not
lend Mr. Shedd's committee all information and
every facility possible in its work of securing busy
Belgian workers for idle Georgia lands.

We are glad to see that the Russian press agent
is being justified at last.

The Republicans should remember that a majority
of 23 can do a whole lot between now and 1916.

The dispatch which says that Germany made a
peace offer to Russia is doubtless true. Germany is
tired of being one against a battle royal.

Washouts

By calling attention in his speech before the Road
Congress Monday to the fact that road management
in this country is to too large an extent inefficient
and wasteful, Logan W. Page, director of the United
States Office of Public Roads, has indicated a course
of thought and line of action that it would be well
for all lovers of good roads and supporters of the
good roads movement to pursue. Mr. Page estimates
that fifty million dollars might have been saved last
year in road construction and repair had more judi-
cious methods been employed.

One of the most fruitful sources of road waste is
a wasteful lack of employment of proper methods of
drainage when a road is improved or repaired. Due
to conditions of soil and climate drainage in the
South is peculiarly essential to anything like perma-
nent improvement in improved highways. This point was
given special emphasis by S. Percy Hooper, state
highway commissioner of New Hampshire, in his
speech before the congress.

What the South needs is to pay attention to the
kind of drainage that it puts on its roads. There
are good roads here but economic administration
must be sought. The theory of good road
building lies in constructing good drainage. Good
surfaces can be put on roads later, but good
drainage makes a satisfactory road. When you
kind of road surface I would plead with the
poorer counties of Georgia which are not finan-
cially able to build roads with expensive surfaces
to expend their energy in building roads with
good drainage.

Time was and not so very long ago when in many
sections of the south and no doubt in other parts
of the country as well there were no carefully laid
plans of road improvement followed year by year
but on the contrary nothing at all was done until
certain roads or certain parts of roads became so
bad as to be practically impassable. Then upon a
night the hue and cry from that part of the country
that something be done at once and something
usually was done at once, but this is what it was.

The road officials set aside an amount of money
which they deemed sufficient for the purpose and
likewise sufficient to still the hue and cry. The con-
tract for the work was given either to the man in
the community who happened to be out of a job at the
time or to the local political boss or to some one
designated by him. In either case the result was the
same—waste, heart-breaking waste; for this occasional
road builder usually piled a few square-feet of dirt
in the stretch of road on which he was operating,
making a rough, tumbled grade and over this scat-
tered a few inches of gravel, called the job completed
and drew his money, the latter, however, being the
most completed part of it.

The first rain that came washed away the gravel
and the second let down the wheels of the passing
vehicles to their hubs and there was another hue
and cry and whole process was again repeated at
more or less regular intervals. Washouts, indeed,
both of dirt and dollars!

It should be observed, however, that every year
brings an improvement in the knowledge of officials,
who direct the appropriation of road money and
greater skill on the part of those who supervise the
actual constructive work. This result is being
brought about by such good road meetings as that
now in progress here and by the quick impatience
of the people at money spent without bad results being
made good.

Georgia, however, is to be congratulated that to a
marked degree its road affairs are well managed and
its road resources judiciously used. Ever since the
convicts were put on the roads, good roads enthusiasm
has possessed the entire state, the people have looked
sharply into all departments of road building and
have spied out waste and inefficiency.

We cannot, however, agree with some of the speak-
ers of the Congress who insist that "the public roads
be taken out of politics." The roads must be kept
near enough to politics to give the voter taxpayer the
power to make road officials, state, county and na-
tional, toe the mark of efficiency and economy.

There must never again be anything similar to the
easy washouts of the past.

Nothing warms up the congregation like cold facts
from the pulpit.

Some men are better satisfied with failure than
others are with success.

Many a man who is sure he's right goes ahead
and finds he was wrong.

A man is always expecting his friends to do for
him what they expect him to do for them.

WOOL AND WOOLENS

By Frederic J. Haskin

English fabrics, like English manners and English
accents, have long been considered the standard of
correctness in this country. When your tailor ap-
pears out a piece of cloth for your inspection, and tells
you that it is an English worsted, you know what it
is for him, and that it cannot be duplicated in this country,
you feel that you are getting the very best, and that
your new suit is going to add vastly to your respect-
ability and self-confidence.

This particular method of picking the vanity of
the customer and advertising the superiority of his
deal is a severe blow by the European war. The supply
of woolen cloth that we usually import from England
has been greatly reduced, not only by the cessation of
condition of shipping which has affected all international
commerce, but by the fact that the British textile
industry is busy filling government orders. The woolen
mills in England are humming and wool is be-
coming scarce there and is rising in price despite the
fact that the British government has prohibited the ex-
portation of raw wool; but it is nearly all being im-
ported into Khaki and blankets for the British soldiers in-
stead of into the hands of the civilian. It is leaving the
British Isles. It is even reported that the British
government is unable to get enough Khaki for its
needs, and is having uniform coats made from serge
and other more or less expensive cloths which the dealers
have on hand.

Meanwhile the value of all the woolen cloths im-
ported into this country decreased from \$10,650,048
during the month of July to \$2,350,208 during Sep-
tember, and there has probably been a still greater de-
crease since the first of the month. The imports from En-
gland, which have always sent us more wools than any
other country, have greatly decreased, while those
from Belgium, which until now have been the main
source of supply, have almost ceased. A even greater decrease is noted in
the imports of women's dress goods, which fell from
\$1,415,474 during the month of July to \$250,000 in Sep-
tember; while the carpets and rugs imported during the
same period fell from \$424,819 to \$13,834. The same
decrease is noted in the imports of carpets and rugs from
Turkey and from Asia, and the entrance of Turkey into the war will doubtless
result in a still greater decrease in these imports.

The most important effect of the dearth of foreign-made
woolens has been to give the American textile indus-
try an opportunity not only to make money now, but
to build up a permanent demand in this country for
home-made woolens. Whether he wants to or not, the
American citizen will be obliged to wear American-made
clothes this year and next, and the American textile
industry is equal to the occasion thus afforded. There
are a few cloths which cannot be duplicated in this country, it is true, but the great
majority of suitings are made just as well here as in
England. Moreover, it is a well established fact that
American-made goods are better made, more durable,
and more economical than those of any other country.
The American manufacturers will hold onto a large part of the business which the war is
throwing their way.

The greatest difficulty which the American manu-
facturer faces is the fact that the United States
itself is not a producer of wool. The wool which we
use is imported from other countries. Germany has heretofore furnished practically the only
large and adequate supply of textile dye in the world.
The British blockade of Germany has cut off this supply,
and the United States is now faced with the necessity
of finding a substitute. By way of Holland, but not
in anything like large enough quantities to satisfy the
increased demand for them. This has led to the
suggestion which is just now being discussed, that
the American textile industry, that the United States
itself is not a producer of wool. The wool which we
use is imported from other countries. Germany has heretofore furnished practically the only

H. TUCKER NAMED COMMANDER OF BROWNS

In the annual election of officers for Joseph E. Brown No. 1778, U. C. Monday night at headquarters in the Silver building, the following veterans were named: J. H. Tucker, commander; A. E. Bearden, first lieutenant; J. F. Williams, second lieutenant; E. E. Edger, third lieutenant; W. T. Archer, adjutant; W. G. Bryant, treasurer; J. C. Hinton, quartermaster; H. C. Beecher, chaplain; David Gann, color sergeant.

Let Optimism Prevail!

It is but natural that the tremendous disturbance across the seas should react at first upon this country. The splendid manner in which this nation withstood the unexpected shock justifies the greatest confidence in our financial institutions, and is a main cause for American Thanksgiving at this time.

This Bank, a strong unit in the community's business life, continues steadfast in its faith in the brightest business outlook. It offers its co-operation to all those who share this faith and are willing to back it up with well-considered efforts. It believes that no time in the future holds better promise of benefits from mutual relations here than right now.

DR. GEORGE L. HANSCOM IS TO LEAVE ATLANTA SOON

Former Pastor of Central Congregational Goes to Hope Sound, Fla.

Dr. George L. Hanscom, former pastor of the Central Congregational church, will leave the first of next week for Hope Sound, Florida, where he will assume active charge of development work of the Indian River association.

Dr. Hanscom will have the title of resident in this company, which purpose is to establish at Hope Sound a second Palm Beach. The location is a few miles north of that popular resort.

Though he had been considering the matter for some time, Dr. Hanscom only decided Tuesday that he would undertake this work. While he will not have active charge of any church, Dr. Hanscom was chosen because of his ability as an organizer and because of his influence for religious and home life he would accomplish the establishment of a permanent community.

The company has already furnished Dr. and Mrs. Hanscom with a home and has given them an automobile and a power boat.

Tuesday night Mrs. Hanscom invited all the members of her Pivara class of the North Avenue Presbyterian Sunday school, to her home, and informed them of her husband's decision to leave Atlanta. More than 100 members and their friends were present and enjoyed Mrs. Hanscom's hospitality.

The performance of Edison Brown, a member of the class, in singing and playing several of his own compositions was a feature of the evening.

COMPLETE ARRANGEMENTS FOR COLORED STATE FAIR

Attractive Agricultural and Industrial Exhibits to Be Shown

Preparations for the Colored State fair to be held at Macon, November 18 to 28, inclusive, are being rapidly completed by President R. R. Wright, Secretary L. B. Thompson and other officials.

The premium list this year is larger than ever before, and handsome awards will be made for the best agriculture, live stock and poultry displays.

The object of the fair as announced by the officials is to encourage colored farmers and colored people along agricultural and industrial lines.

The fair this month at Macon will be the eighth annual negro fair in the state, and promises to be highly successful.

GEORGE FLEMING MOORE TO LECTURE TO MASON

All Scottish Rite Masons are invited to attend the lecture of George Fleming Moore, grand commander of the southern jurisdiction of the Ancient and Accepted Scottish Rite, at the Masonic temple Thursday night.

Monday night Commander Moore, who is the city attending the tenth general convocation at the Atlanta consistory, was entertained by a banquet given by the Atlanta consistory at the temple.

H. W. Witcover, Carl Pfau and M. A. Wier, other prominent members of the order, are attending the convocation.

BEAVERS SHUT OUT OF POLICE BOARD MEETING

Commissioners Close the Door Against Police Chief—Action Significant

The board of police commissioners, led by Mayor James G. Woodward, paid its respects to Chief of Police J. L. Beavers Tuesday night by withdrawing his hitherto unquestioned right to remain with the board during its deliberations in executive session.

No action of importance was taken in the meeting but it is known that most of the discussion of the executive session referred to what some of the commissioners termed "The autonomy of Chief Beavers."

The chief, it is said, was freely accused for his alleged failure to consult the board on many important matters.

Several of the board members were "peevish" because of the custom of the chief to use his own judgment, without reference to the board, in matters of importance. Several declared at the meeting that the chief's conduct should be referred to what some of the commissioners termed "The autonomy of Chief Beavers."

Some of the commissioners, it is said, desired at the meeting to at least censure the chief, but Commissioner W. D. Pain made a motion to adjourn in order that all commissioners might think over the matter until the next meeting, and the motion prevailed.

The action of the board in barring the official from the session is regarded as significant, coming as it does on the heels of the grand jury's declaration of a plea for closer co-operation of the board with the chief. The action of the board is believed to be the forerunner of other steps which will be taken by the chief, notably the abolition of the board's rule only to elect an officers in the department, men who have been recommended by the chief.

For more than a year the board has had in force a rule which says that only men nominated by the chief can be elected to vacancies. As this is only a rule of the board it can and probably will be revoked.

Generally the action of the board is expected to be followed by a general curtailing of the chief's powers if not a fight to actually eliminate him.

In the course of the executive session, the board members are said to have discussed the recent grand jury probe, which the mayor has openly declared was inaugurated for the purpose of "white-washing" certain officials.

Commissioner Vernoy, who was a member of the grand jury, is said to have talked at length about the probe.

The board went into the executive session on the motion of the chief, who did not mention the name of the chief, but said that he thought the executive session would be executive in fact as well as name, and only board members should be present.

In the open session the board adopted a resolution requesting the city courts to pay policemen, who spend so much of their time there, a witness fee.

MR. CICERO LONG'S BURIAL POSTPONED TILL THURSDAY

Delayed Arrival of Daughter From Washington Changes the Funeral Plans

Because of the delayed arrival of his daughter from Washington, D. C., the funeral of Cicero E. Long has been postponed until Thursday afternoon at 2:30 o'clock.

The following have been requested to act as pallbearers: Dr. J. W. Roberts, Dr. R. E. Wright, Dr. H. G. Carter, Dr. L. G. Baggett, Dr. L. W. Irwin and H. A. Smith, they will meet Thursday afternoon at 2 o'clock at Pope's chapel.

The funeral services will be held from the residence 411 Central avenue, The Rev. J. Ellis Sammons, of Griffin, will officiate, assisted by Rev. W. J. McIlwain, pastor of the Capitol Avenue Baptist church. The interment will be in West View cemetery.

JUDGE HILL SUSTAINS JESSE LEE'S DECISION

Judge Ben H. Hill, of the superior court, denied Monday afternoon a writ of habeas corpus asked by Lella Moon, the wife of Tom Moon, for her release of Tom Moon from the city stockade. Lella contended that Tom's sentence of 15 days or thirty days for disorderly conduct, imposed by Councilman Jesse Lee, acting as recorder, was both unfair and illegal.

Councilman Lee appeared before Judge Hill as a witness, and testified that the evidence against Moon was sufficient to justify the sentence. Judge Hill so found, and dismissed the writ.

SOUTHEASTERN FREIGHT ASS'N ANNOUNCES CHANGE

E. H. Hinton, chairman of the Southeastern Freight association, has issued a circular announcing several changes in the official force of the association as the result of the recent death of Mr. Walter Lee McGill, who was secretary for many years.

John H. Glenn has been made chief clerk of the bureau in charge of the common tariff department; D. C. Lawrence has been appointed secretary; W. H. Halsey is assistant secretary, and W. C. Watters is cashier and chief accountant.

WM. WINTERS SUE BY WIFE FOR A DIVORCE

Alleging that her husband is a prosperous proprietor of a motor car business on Luckie street, from which he derives a large income, Mrs. Josie Winters filed as the plaintiff William Winters in the superior court Tuesday for divorce, claiming the possession of the property, nor daughter, Vivian Winters, nine years old. Mrs. Winters says she and her husband have been married ten years. Desertion is given as the grounds for divorce. R. H. Kimball, attorney, filed the suit.

B. L. WILLINGHAM IS RAPIDLY RECOVERING

Friends of B. L. Willingham, president of the Willingham-Tift Lumber company, will be glad to hear that he is rapidly recovering from illness and will be back in Atlanta Wednesday.

Mr. Willingham has been ill for several months at his summer home in Myrtle, Conn. He left there Monday in his private car, and will reach Atlanta Tuesday night. He will be at home for the winter at 728 Piedmont avenue.

"BELIEVE IN GEORGIA?" TOPIC OF THE AD MEN

"Do you believe in Georgia?" will be the subject of discussion at the Ad Men's luncheon at 1 o'clock Thursday afternoon in the banquet hall of Hotel Woff.

KIRK AND GORMAN GET PROMOTIONS BY LANFORD

J. H. Kirk, a patrolman, and G. M. Gorman, a night bicycle policeman, have been promoted to the detective department, following their efficient work on the force.

Chief Lanford asked for four extra men for his force, but was granted only two. He chose the officers mentioned above.

"No Alum"

must be the watchword when the housewife buys baking powder.

Alum is well known to be a powerful astringent, and should never be used in food.

Prof. Geo. F. Barker, M. D., of the University of Pennsylvania, says: "I consider the use of alum baking powder highly injurious to health."

Food economy now, more than ever, demands the purchase and use of those food articles of known high quality and absolute purity and healthfulness.

ROYAL Is a Pure, Cream of Tartar BAKING POWDER Contains No Alum

Perfectly leavens, leaves no unhealthful residues, makes the food more delicious and wholesome.

Mackinaws and Sweaters

"Tech" and "Ga." Colors

128-142 MARIEETTA ST. — ATLANTA GA

War Relief Meeting
The women in the Atlanta and vicin-
ity are requested to meet Thursday
evening at 7 o'clock at the home of
William E. Campbell, 350 Peachtree
avenue.

Silver Tea
The ladies of the Altar society of
the Sacred Heart church, will give a
silver tea Wednesday afternoon, No-
vember 18, from 3 until 6 o'clock, at
the home of Mrs. Robert D. Spalding,
on Peachtree street.
All are cordially invited to attend.

MEMBERS OF WOMAN'S CONFERENCE

THEY were taken prominent part in the meetings of the Woman's Auxil-
ary to the Road congress, and were guests at the tea given Tuesday after-
noon by Mrs. John M. Slaton at the Georgian Terrace.

PERSONAL MENTION

—Mr. R. L. Ballenger, of Tryon, N. C., and Mrs. Robert C. Mosely, of Columbia, S. C., arrived Sunday to visit Mrs. T. Ballenger on Myrtle street. Mr. Ballenger is attending the Good Roads convention and will remain in the city for the week. Mrs. Mosely will be the guest of her mother, Mrs. Ballenger, for several weeks and many parties are being planned in her honor.

—An interesting event of Wednesday evening, will be the wedding of Miss Nina White and Mr. Cherry Logan Emerson, which will be solemnized at 3 o'clock at the North Avenue Presbyterian church. The ceremony will be followed by a reception at the home of the bride's parents, Mr. and Mrs. W. Woods White, on Howard street.

—Miss Ruth Rosser will arrive Friday from Bremen, Germany, to spend the week end with her parents, Mr. and Mrs. Luther Rosser. She will be accompanied by her schoolmate, Miss Jane Leach, and together the charming young college girls will be entertained at a series of informal parties.

—Mrs. Andrew Pickens Calhoun, of San Antonio, Tex., arrived Sunday. Mrs. Calhoun formerly lived in the city and many informal entertainments will be given in her honor.

—Mrs. H. A. Manning entertained the members of her card club and a few invited guests at bridge Tuesday afternoon. Mrs. J. W. Haden and Mrs. C. P. Cromer, won the club prizes, and the guest prize was won by Mrs. E. S. Mabry.

—Mr. and Mrs. Robert Malner Wade, who have been spending the past two weeks in the north were the guests of Judge and Mrs. E. L. Wade en route to their home in Madison. Mrs. Wade was formerly Miss Caroline Foster.

—Miss Alice May Freeman won the prize for top score and Mrs. Lamar Rankin cut the consolation prize, at the bridge party given by Miss Elizabeth Morgan Tuesday in honor of Mrs. Henry Ewing Dean.

—Mrs. A. W. Calhoun, Miss Harriet Calhoun and Mrs. Junius Oglesby, Jr., will return Wednesday evening from New York where they have been spending several weeks.

—Mr. and Mrs. Thomas Keenan announce the birth of a daughter Friday, November 6, who has been named Sarah Ann, for her maternal and paternal grandmothers.

—Dr. J. M. Swinogood left Tuesday for Washington, Wilson county, to be best man at the wedding of Dr. T. A. Price, and will return home Thursday.

—Miss Sarah Simpson, of Toxco, will arrive Wednesday to be the guest of Mrs. William Eckford and will attend the Georgia-Tech football game.

—Dr. E. G. Ballenger left Monday for Richmond, Va., to attend the convention of the Southern Medical association, and will be absent for the week.

—Mrs. Ernest Williams, of Lynchburg, Va., arrived Tuesday to be the guest for two weeks of Mrs. Porter King on Peachtree street.

—Mrs. Dorsey H. White has returned to her home in Memphis, Tenn., after a visit to Mrs. J. S. Jetton, at her home on Westmoreland avenue.

Announcements

IMPORTANT MEETING.
The Piedmont chapter of the D. A. B. will hold an important meeting in the parlors of the Piedmont hotel on Saturday afternoon at 3 o'clock. A full attendance is requested.

STUDY CIRCLE OF DRAMA LEAGUE.
Study Circle No. 1, Atlanta Drama League, will meet Thursday at 11 o'clock, in Carnegie library. The reading for this month is Henry Becun's "Wings of Paris," the second in a series of modern French dramas. All interested are cordially invited to attend.

BIBLE CLASS TO MEET.
The Bible study class taught by Mrs. T. R. Kendall, of Marietta, will meet Thursday morning at 10 o'clock, at St. Paul M. E. church, South corner of Grant and Pryor streets. The lesson for the morning will be taken from the book of Psalms. All are cordially welcome.

EMBROIDERY CLUB.
The 1011 embroidery club will meet Thursday afternoon at 3 o'clock, at the home of Mrs. Jenkins, 22 Chandler street. All members expected to be present.

Tomorrow
Emphasizes Our Supremacy
In Value-Giving
Featuring
Fine Suits at
\$25.00

Mr. Seay, manager of Southern Suit & Skirt Co., advised the use of the "loud pedal" in announcing these "Special Values" in Suits at \$25 for Thursday.

We wish we could sound this message of Economy and Satisfaction to every woman in Atlanta, who intends putting \$25 into a suit and at the same time would like to save \$10 or \$15. Every suit in this sale is worth to \$35 and \$40. To compare these values with other suits usually sold at \$25—is to prove at once, our supremacy in value-giving.

Superb in Fabrics, Colorings and Styles!

The fabrics are rich broadcloths, gabardines, French serges and poplins. The colorings are Ethiopian brown, Russian green, Belgian blue, plum, navy and black.

The styles are the popular Redingotes—attractive postillion modes and plain tailored models. Fur or velvet trimmings.

Also the individual short coat models, many trimmed with fur or combined with broadtail. Fashion no longer says "thou shalt," and if the 45-inch coat is more becoming to you, wear it— if the short or medium lengths appeal to you, they are here.

Arrange to be here tomorrow EARLY and see these Suits. It is a very unusual opportunity.

Expert Alterations—No Charge.

CASE AGAINST BURNS' MAN TO BE DROPPED

Solicitor Does Not Believe He Has Sufficient Evidence to Convict Dan Lehon

The cases of Arthur Thurnham, lawyer, and C. C. Tedder, one-time Burns employee, both charged with subornation of perjury in reference to the indictment of the Rev. C. H. Ragdale, made in the Frank case, were set for trial in the superior court for Wednesday, but during the day were postponed indefinitely.

It is significant that the case against Dan S. Lehon, chief aid to William J. Burns, who was indicted with Thurnham and Tedder in the same case, has not been placed on the calendar. While Solicitor Lehon has made no statement it is generally known that the indictment against Lehon will be dropped, the state's attorney having been convinced that it would be impossible to convict Lehon on the charges. Lehon is now said to be in New York, although he remained in Atlanta a number of months, waiting for a trial, and when he left expressed himself as preferring a trial to the quashing of the indictment against him.

The testimony of the Rev. Ragdale, which the indictment was based upon, did not implicate Lehon as did Thurnham and Tedder. All three men were indicted on May 22, following the repudiation by Ragdale of an affidavit in which he claimed that he and R. L. Barber, one of the former members of his church, had heard a negro identified by Barber as Jim Conley, confess the murder of Mary Phagan, for which Leo Frank has been convicted.

The preacher declared that he received \$250 in the office of Thurnham after he made the affidavit. Ragdale has been indicted for perjury, but the case against him has not been set. Barber has been indicted on the same charge, but he has not been arrested. It is said, however, that the state has secured his testimony against Tedder and Thurnham in an affidavit, although the statement cannot be verified.

EYES AND ECONOMY

The Folsom & Blanchard rimless eyeglasses represent economy and style because the lenses are mounted in the use of screws. Cannot become loose easily—and they are better than show windows. W. W. Alabama street—(Adv't.)

J. W. GRIFFIN LOSES IN HIS FIRST APPEAL

Pleading upon questions certified to it by the state court of appeals, the state supreme court Wednesday morning held as constitutional the statute under which J. W. Griffin, former president and director of the Athens Trust and Banking company, was recently sentenced to six and a half years for the alleged fraudulent conduct of the bank's affairs.

Griffin took his appeal to the court of appeals, and one of the grounds was the alleged unconstitutionality of the statute under which he was convicted. This question was referred to the supreme court. The court of appeals now decide the other points raised.

CONSTAGNY PLEADS GUILTY TO CHARGE

Constagny, a former Mitchell street merchant, entered a plea of guilty in the federal court Wednesday to an indictment charging him with receiving stolen goods. He was sentenced to six months in the penitentiary, with making a false oath, when he entered the plea of guilty. The court of appeals now decide the other points raised.

PAYING HIS DEBTS WITH HIS COTTON

The circulation of cotton as payment of debts was illustrated Wednesday in a bankruptcy case in the federal court. A. W. Hopkins, of Graniteville, stated in his petition that he had made part payment to Hall & Jones, his counsel, with \$50 pounds of cotton.

Fair Weather Thursday

Weather Wednesday evening and Thursday, with slowly rising temperature, reported the official weather bureau Wednesday afternoon. The cold temperature registered Wednesday morning was 48 degrees above zero, which was in sight for the remainder of the week.

ART SHOW PROVES ATLANTA HAS MANY TALENTED ARTISTS

Art Association Directors Surprised at Quantity and Quality of Work Presented for Exhibition

Atlanta is full of artists and nobody knew it until the opening of the art salon at the Ponce de Leon apartments under the auspices of the Atlanta Art Association.

Of course the association, a good many of whose members are artists, knew there were artists in Atlanta, and its acquaintance extended beyond the limits of its own membership; but it was surprised at the quantity and quality of the work presented for exhibition. The association now realizes that probably it has been devoting too much attention to artists abroad and not enough to artists at home, and accordingly its future policy will be to concentrate itself chiefly and primarily with the encouragement and stimulation of the artists of Atlanta.

When the association announced that it was going to hold a salon for local artists and invited them to submit their work to a jury which would select such as might be worthy of exhibition, there was some doubt as to whether the resources would be sufficient to make the salon worthy of the name.

ARTISTS FLOCKED IN. The doubt was of short duration. In a very few days the jury was literally swamped with offerings. Artists came from every part of the city with arms full of work—to use a somewhat inartistic expression—it was good work. So good, in fact, that the jury were unanimous in deciding to give practically all of it a place in the salon. So that now the walls of a large room on the ground floor of the Ponce de Leon are covered with paintings, pastels, water colors, pen and ink drawings, etchings, etc., and there are statues and arts and crafts work and some stained glass windows and a wealth of other things which a person doesn't have to an artist to appreciate. On the opening day of the salon, last Sunday, more than 500 people went to see the exhibits, and Monday and Tuesday there was a large attendance, and the prospect is bright for a continuance of big crowds throughout the week.

It is foretold is not meant to convey the impression that the art association considered Atlanta a city barren of art and benefit of artists, or that it underestimated the ability of the artists of Atlanta whom it did know. The simple fact is that Atlanta has more artists and better artists than the association dreamed of until the announcement of the salon, and of course the association is delighted with what the salon has brought forth.

SOME OF THE WORK. Among the work submitted is a group of pastel landscape scenes in and around Atlanta by C. R. Hardy, an artist who has been here several years unknown to the association. The pictures have attracted much attention. One of the most of a windy day on the beach, one of a sunset, one of a city street scene, and several others. They are in soft tones which indicate a strong sympathy with nature in her milder moods.

Miss Marie Haines, whose work already was known to her immediate friends, has a very novel exhibit of arts and crafts and some good landscape scenes. One of the most interesting is a stone step leading up to the residence of Edward H. Imman, in Ansley Park. It is a vigorous and forceful picture in full sunlight, and the details of the stairway are as true to life as a photograph.

Another Atlanta scene which has attracted much attention from discriminating visitors is a chalk drawing of a fire in the downtown district by Porter Kelly.

Miss Marion Otis has some vivid paintings of scenes in and around Atlanta. There is a scene on a golf course, a scene in Ansley Park, and several others. They are brilliant in color and somewhat impressionistic in treatment.

If a similar high level of the local scenes exhibited by Miss Virginia Woolley, one of the most talented of the younger artists in the city. Mrs. Henry H. Scott, secretary of the art association, has some small landscape sketches which have been much admired. Among them are "A Gray Day," "Peachtree on Peachtree Road," and "Brookhaven Pines."

The women artists Louise Mellichamp, a young Atlanta girl who has strong talent, has been commended upon by

COL. RICHARD A. JOHNSON IS CLAIMED BY DEATH

Served in Civil War Under "Stonewall" Jackson—Was Successful Business Man

Richard Allen Johnson, retired real estate operator, died Tuesday night at his residence at the Georgian Terrace hotel. He was in his seventy-second year.

Colonel Johnson was a veteran of the Civil war, serving under the command of General "Stonewall" Jackson. He was born in Palmetto, Ga., and was the son of J. H. Johnson, a planter of that place. After the war, Colonel Johnson moved to Newnan, Ga., later removing to Atlanta and engaging in the real estate business. He was the partner of the Johnson combination firm.

On December 2, it was further alleged, Mrs. Manston went to the store and made a purchase and ordered it charged to Mrs. Argaud. The house detective approached her and asked if she were Mrs. Argaud, to which she is alleged to have replied in the affirmative: whereupon the detective asked her to please sign her name to the order slip, which she did. The name she signed, it was alleged, was that of Mrs. Argaud. She was detained until Mrs. Argaud could be reached on the telephone, and was then arrested.

As soon as the indictment was returned, Attorney Harvey Hill, representing Mrs. Manston, went immediately before Judge Hill and requested him to issue a writ of habeas corpus for Manston on condition that she would leave town at once. This the court refused to do, dealing with the case as a misdemeanor instead of a felony, which felony is under the laws of Georgia and imposed a fine of \$50, which she paid.

JEALOUS HUSBAND SLAYS WIFE THEN KILLS SELF

(By Associated Press.) ST. LOUIS, Mo., Nov. 11.—A man and wife, of Cushing, Okla., today were found dead in a local hotel. Apparently the man shot his wife and then committed suicide. Nine bullet holes were in the woman's body and one in the man's.

Letters from another man to the woman were found in the room and it is thought jealousy prompted the crime. The letters, which were signed "Bill," indicated the writer was planning to help the woman get a divorce. They indicated that Noddy and "Bill" were business associates in Cushing or Tulsa, Okla.

MANY GOOD PORTRAITS. There are numerous portraits of exceptional merit. One is a portrait of V. H. Krieshaber, the well known Atlanta business man, painted by G. A. Kaplan. Another is a sketch of a woman by Miss M. A. H. Smith which shows keen insight into character and very skillful brush work. In this connection one of the most interesting is a fine oil painting of a picture of a bull dog's head painted by T. R. Lewis, a young messenger boy, who has never had a lesson. It is really an excellent likeness and shows strong talent. The boy is very anxious to study.

Notable among the work of the better known artists is that of H. H. O'good and Wilbur Kurtz. The former has a large attendance, and the prospect is bright for a continuance of big crowds throughout the week. One of the most interesting is a picture of Spanish cadavers at St. Augustine, Fla. Mr. Kurtz has several scenes of southern dailies in characteristic attitudes. One of the surprises of the salon is the stained glass exhibit of W. L. Douglas. The art association did not even know there was anyone in Atlanta doing this exceedingly difficult work. The windows shown by Mr. Douglas are beautiful in conception and treatment, and their warm coloring is especially pleasing to the eye. The windows predominate. One particularly fine window is entitled "Christ Among the Doctors in the Temple." Mr. Douglas also has some oil paintings.

The salon will be open through the present week from 10 in the morning until 5 in the afternoon, and will be open Thursday evening.

LOSS OF APPETITE is the first sign of a torpid liver. It is followed by coated tongue, bad taste in the mouth, sick headache and constipation. **Tutt's Pills** restore the appetite by gently regulating your liver. Sugar coated or plain—at your druggist.

WOMAN INDICTED FOR FORGERY, PLEADS GUILTY

Record for Quick Justice Made in Case of Mrs. N. C. Manston

A well dressed, handsome woman giving her name as Mrs. N. C. Manston, was indicted by the Fulton county grand jury Wednesday morning for forgery, was fined \$50, and prepared to leave town at once, all within less than 30 minutes.

It was alleged that Mrs. Manston has been going to a certain department store at frequent intervals for several weeks, making purchases, and having them charged to Mrs. George E. Argaud, of 594 Highland avenue. Mrs. Argaud notified the store and the house detective commenced a sharp lookout.

On December 2, it was further alleged, Mrs. Manston went to the store and made a purchase and ordered it charged to Mrs. Argaud. The house detective approached her and asked if she were Mrs. Argaud, to which she is alleged to have replied in the affirmative: whereupon the detective asked her to please sign her name to the order slip, which she did. The name she signed, it was alleged, was that of Mrs. Argaud. She was detained until Mrs. Argaud could be reached on the telephone, and was then arrested.

As soon as the indictment was returned, Attorney Harvey Hill, representing Mrs. Manston, went immediately before Judge Hill and requested him to issue a writ of habeas corpus for Manston on condition that she would leave town at once. This the court refused to do, dealing with the case as a misdemeanor instead of a felony, which felony is under the laws of Georgia and imposed a fine of \$50, which she paid.

KANSAS BRIDE IS SHOT FROM AMBUSH NEAR HOME

(By Associated Press.) TOLEDO, Kan., Nov. 11.—Mrs. Roy Adair, wife of a wealthy young farmer, was shot from ambush and killed early today while driving in a motor car with her husband. The shooting took place on a lonely road five miles from Toledo, twenty miles from the place where the husband was killed. The scene was within a mile of the Adair home. A shotgun was used by the assassin. The police have no clue.

Funeral of Mrs. H. C. Colbert

The funeral of Mrs. H. C. Colbert will be held Wednesday afternoon at 3 o'clock from the residence, 211 Glenwood avenue, and interment will be in Oakland cemetery.

SEE IF THE CHILD'S TONGUE IS COATED

If cross, feverish, constipated, give "California Syrup of Figs."

Look at the tongue, mother! If coated, it is a sure sign that your little one's stomach, liver and bowels need a gentle, thorough cleansing at once. When peevish, cross, listless, pale, doesn't sleep, doesn't eat or act naturally or is feverish, stomach sour, breath bad, has stomach-ache, sore throat, diarrhoea, full of cold, give a teaspoonful of "California Syrup of Figs" and in a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of its little bowels without griping, and you have a well, playful child again.

You needn't coax sick children to take this harmless "fruit laxative"; they love its delicious taste, and it always makes them feel splendid. Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which has directions for babies, children of all ages and for grown-ups plainly on the bottle. Beware of counterfeiters! To be sure you get the genuine ask to see that it is made by "California Fig Syrup Company." Refuse any other kind with contempt.—(Advt.)

Extra Year - and Solid Comfort

Dr. A. Reed Cushion Shoes give you better service than any shoe you can buy. Not because they are made of better materials than most good shoes, but because the soft, fibre, cushion insole absorbs the jar and lessens the grinding of the sole and heel on hard walks and rough pavements. With the added wear you also get absolute foot comfort. It is a money-saving, ache-saving shoe—Come in and look at the many styles.
